Webinar Housekeeping

The screenshot shows a webinar interface with a presentation pane on the right and a sidebar on the left. The presentation pane displays a slide titled "Building the DevOps Tool Chain" dated "January 17, 2017". The slide features the Vivit logo and the text "Discover the independent HPE software user community where you can share, collaborate, exchange, and grow". The slide is divided into sections: "LOGO/PICTURE" with the Vivit logo, "Q&A" with a "Ask a question" prompt, "DOWNLOAD FILES" with a table showing "No file Found", "COMMUNITY" with an image of people, "Solutions" with a gear icon, "ADVOCACY" with an image of a meeting, "SUCCESS" with a gear icon, and "EDUCATION" with an image of a crowd. A red arrow points to a small rectangle in the upper right corner of the presentation pane.

HPE AppPulse

A smarter app monitoring solution to
deliver one fantastic user experience

Learn How to Deliver an Amazing User Experience with your Application using HPE AppPulse Suite

Welcome	5 minutes
UX and AppPulse Suite overview	20 minutes
Demo	30 minutes
Q&A	5 minutes

The user experience is like a road trip.

It's not about the destination...

It's the journey.

“UX is the perceived quality when the user is doing a work task.”

Used with permission –

“Delivering User Experience with Agile Development Teams” by Magnus Revang

Gartner, June 25, 2015

What defines user experience?

User Experience Drives Business Outcomes

“It may be **acceptable** to make purchasers wait 2 to 4 seconds after typing in their address and credit card number, **but not at an earlier** stage when they may be comparing various product features.”

From Strategy to Tools, O'Reilly Media

“**One-point** improvement in a US wireless provider’s Customer Experience Index (CX Index™) score results in an **additional \$175** million in revenue”

Forrester

It pays to keep their journey smooth.

When the UX is a delight,
users love you.

When something goes
wrong, there's hell to pay.

A superb user experience gets you:

- Happy customers, great reviews.
- Increased sales.
- Reduced support costs.
- Good karma.

Cost of application downtime:¹

\$336K/h_U

—Gartner

\$500K/h_U

for critical failures
—IDC

\$100M/y_U

—Infogenics²

Waiting too long to respond to UX issues?

Few app teams are proactive

74%

of app teams fail to proactively examine user experience metrics in production

Lacking curiosity

72%

of app teams first learn about UX issues through user complaints

Risky Release into Production

40%

of apps teams will release apps into production that fail to meet UX objectives

UX: Who needs what?

IT Ops:

"I want to ensure availability & performance of app & backend."

Business:

"I need a 5-star rating for my web & mobile apps."

DevOps:

"I need visibility of app issues from user action to the line of code"

UX monitoring guide – optimizing the user journey

Know who your users are

- Geo-location
- Version adoption
- Average usage time
- Operating System
- Device type(mobile)
- Connection type
- Browser type

Understand your user's experience

- UI response time by location
- Search & display specific user visit
- Holistic UX score
- Performance
- Stability
- Resource usage
- E2E operational data
- Sentiment Analysis(mobile)

Monitor User journey

- Common user flows / journey in real time
- Emulation of common user actions & devices
- Most used actions
- App usage patterns
- Transaction history
- Reports of trends over time
- Alerts

Correlate UX to backend services

- Trace transactions end to end
- Correlate user actions to issues with backend services
- Store Big Data to establish trends over time
- Submit issues to defect mgmt tools
- Agile closed loop process for fixes

Delivering a delightful UX: what's required?

Synthetic monitoring

Real user monitoring

Transaction monitoring
and diagnostics

Aligning a smarter monitoring solution to requirements

Let's revisit our 3 UX professionals

The capability they need:

The product that will get them there:

IT Ops

Emulate user actions and devices; uphold SLAs

Proactive Monitoring

Business

Measure everything impacting digital UX for both Web & Mobile

User Experience Monitoring

DevOps

Trace user transactions down to line of code

Transaction Analytics

Introducing a smarter solution

Proactive, continuous, real-time synthetic monitoring of ALL your applications—mobile, web-based, and desktop.

HPE AppPulse Active

Monitor the real user experience for web with visibility to page load times, SPA pages and AJAX activities.

HPE AppPulse Web

**HPE
AppPulse
Suite**

HPE AppPulse Trace

A SaaS APM solution that tracks end-to-end transaction flow through all service tiers, to let you isolate problems to the line of code or the specific log message.

HPE AppPulse Mobile

The first complete solution for measuring the user experience of mobile apps and analyzing the business impact of user engagement.

HPE AppPulse Active: Get proactive.

- **Visibility** into all your apps
- **Synthetic monitoring** to proactively see and fix issues
- **Isolation** by application, location, transaction, or component layer
- **Single pane of glass** for easy monitoring
- **Easy installation** in about 5 minutes
- **Integration** with trusted DevOps tools
- **Collaboration** among development, QA, and operations teams

HPE AppPulse Mobile: Measure what matters most

Performance

- Launch time
- UI response time

Resource usage

- Battery drain
- Data usage

User reviews

- Sentiment Analysis

Stability

- Crashes
- Errors

User flows

- Follow user interactions, screen by screen

HPE AppPulse Web: Measure what matters most

Performance

- Slow page loads
- Slow SPA pages loads
- Slow AJAX calls

Stability

- Page views with errors
- Errors by type

HPE AppPulse Trace: Isolate and fix transaction issues

- **Smart user-server correlation** – correlation of UX issues with server-side problems
- **Integrated web user monitoring** – monitor UX from real user browsers
- **Trace 360** – trace all aspects of transaction execution
- **Transaction log tracing** – deliver correlated view of log message

AppPulse Suite benefits summary

Comprehensive SaaS
APM solution

Proactively identify app
issues before users do

Identify which performance
and stability issues are
impacting real app users

Correlate issues from user
experience, to application
execution, to its underlying
infrastructure

**Net result: Continuous assessment and continuous improvement
of both the application and the UX.**

Real customers, real results.

“Performance data mined in HPE AppPulse helped us build better apps for our users.”

“HPE AppPulse freed up our IT team to focus time and resources on finding new ways to engage customers, rather than merely fixing technical problems.”

“Slowdowns directly impacted our revenue. HPE AppPulse traced transactions E2E to resolve problems fast!”

“We used AppPulse to identify a slowness, diagnose the problem and resolve it. Reducing Tx load time from 20s to 2s”

And many more...
